

# Can Historic Christianity Stand Up... The Claims of Science Psalm 33:6-9, Hebrews 11:1-3

*True Science could be, SHOULD BE Christianity's friend. Scientific inquiry was launched with Christianity's blessing, because it only stood to validate the claims of truth in the Bible. TRUE SCIENCE will indeed do that... if we permit it.*

Science is: "The pursuit and application of knowledge and understanding of the natural and social world following a systematic methodology based on evidence."

The Bible is NOT a science book, but where it speaks on matters associated with the scientific study of this world made by God, it is proven true.

The attacks on faith must be met and answered if historic Christianity is to stand up to its critics:

1. "Logical attack"- Faith has no meaning...
2. "Psychological attack"- Faith explains nothing...

3. "Scientific attack"-- Faith cannot be proven in the lab.

**1– The Intricate Design of the Complexities of the Universe Demands a Designer... and we know His Name. (John 1:3)**

**2– The Fields of Science Offer Testimony to the Incredible World God Has Spoken Into Existence. (Ps. 33:6-9; Hebrews 11:3)**

**3– Hints of Scripture alert perceptive men to understand more of what God has made.**

*God's Question to man is still as it was in the ancient times to His servant Job... "Where were you when I laid earth's foundations?"*
